I want to have an affair!

The Little Black Book of Cheating

Introduction

Are these circumstances for real?! You are left wondering as you flip through these pages. You wonder if any of them have any grain of truth to them as you think of your own circumstances. You may be one of these people discussed in this little black book of affairs. You may have experienced one of these case studies or you may even be on track to becoming one of these people. Having an affair is a big event in anyone's life. Cheating on a spouse is a big moral no-no, but of course life has a lot of grey areas. You may be the exception to the rule.

Many people have ventured down this path of immorality. Some have survived and have strengthened their current marital bonds. But the majority has called it quits after the infidelity of one partner in life. It is well known that divorce rates are sky high and growing.

In this special issue of GFE Magazine the Cheat Guru answers some questions about affairs...

Myth Broken

I've heard that when people have affairs, it strengthens the marriage.

-- Margery

Ummm. No Margery no. Statistically speaking, if that were true we would be seeing a decrease in divorce rates (which definitely isn't true since they are increasing in most developed countries).

But breaking your husband's trust would definitely have its long term effects – no matter how much he loves you. In fact, the more he loves you, the deeper the scar will be.

On the brighter side, you may learn a new technique or two to help out your current sex life.

Pregnancy and Affairs

I had an affair and I fell pregnant. How do I tell the father?

-- Dumb Blonde

Of course the name is an alias! I think I gave you a much deserving alias. If you ask anyone for advice the answer is easy. Tell the truth and tell him soon. But that latter part isn't that easy for you. But girl, you must amp up the courage and do it. The more you procrastinate, the harder it will get.

Also – be sure who's baby it is ok? Your husband or your lover?

Affairs are Exciting!

Having an affair is so exciting... so exhilarating! I wish everybody could do it! I joined a social website, arranged a few meetings and I made it happen! I didn't get caught. Phew!

It made me so excited. So much adrenaline was rushing through my body from the affair.

Just like in the movies... I had to make sure my husband didn't meet my lover. The cover-ups, the close calls and deception involved mixed up emotions with stress, insomnia and paranoia... ! I would do it all again. It was a continuous high and an exciting rollercoaster ride.

-- Jenny

Woah. A success story. Now that's rare. Good luck to you.

To have an affair or not have an affair? – that is the Question

I'm at a crossroads. I'm being tempted to cheat. I'm so tempted.

I'm a married woman in my early 30's with a husband that I love but now sexually attracted to. There is no sex life in our marital lives.

I'm looking for some extra-marital action.

-- Celeste

Go for it baby! You only live once. Be sure to cover your tracks and don't change too much while you're in the affair. You don't want your spouse noticing anything has changed. This includes your habits (tv, food, exercise) and your wardrobe. Keep the same schedule.

If you want to find other people (single or hitched) who want to be involved in the affairs/cheating scene lookup Ashley Madison by clicking here.

Hottie Co-Worker

I'm one year into my marriage and I'm bored. The marriage wasn't what I expected. Sex life is... there is none.

Recently, a new co-worker walked into my scene. She's a real hottie. She's also expressed some interest in us getting together and she knows I'm married. She's seen the ring.

I find myself daydreaming about her. Fantasizing our time together. What do I do? I'm young and I have no sex life! Please help!

-- Bob

I would suggest action. If you were to do nothing tomorrow about this situation and pretend you aren't even thinking these thoughts, you may find yourself with worse circumstances in future. You need to release that sex drive.

I'm not saying masturbation is the solution.

You have two real options: To proceed with an extra-marital affair with this new hottie of a co-worker of yours. The other is to look at alternatives. Yes, I'm talking about escorts and prostitutes. (And the final option is to just talk about the sex problem with your current wife).

Cheating on your wife and taking a lover would involve emotional long term baggage. The latter option with escorts is a much shorter term problem to ease the urges.

I'll leave you to think about it. -- Cheat Guru

The Maid

I have a maid with whom I've had an affair. But we haven't had intercourse. But she has expressed interest lately...

-- Jim

Wow, that's one man's fantasy coming true. Please think safe sex before anything else. -- Cheat Guru

An Eye for an Eye

My Wife Cheated. I'm cheating too.

-- *A Guy*

An eye for an eye before the world goes blind...

No. No cheating for you.

You must think – do you still love your wife? Can you forgive her? Or do you want to move on to greener pastures?

-- Cheat Guru

Caught Something

I had an affair and now I have STD. What do I do now?

-- *Kidd*

Serves you right for not checking all your bases.

Cheating puts you in a whole different field. You must be like James Bond – you need to keep everything a secret and make sure nothing goes wrong. You don't want any nasty surprises.

Go beg for forgiveness.

Should I Tell?

I have four kids with my husband. I cheated on him. I didn't want to hurt the kids so I ended the affair. Should I tell my husband or keep quiet? Do I just live with the guilt so it never happens again or tell my family and possibly ruin my family as I know it?

-- Bonnie

Tough circumstances. Ending the affair was a smart move. You've had your share of excitement. Affairs (well "successful affairs") don't last long. It's time to move on.

It's good that you still show love and feelings for your husband and kids by ending the affair.

Telling them may ease your conscience but it could damage your husband's life and have your children hate you for the rest of your life.

There may come a time when you must tell them. But for now, the smart move may be to not tell them.

The best move is to talk to someone. Someone you can trust, someone who can help you find out why you first fell into an affair. Solving that may help you understand yourself better. Go find that counselor.
